

Ann Wozniak

AIA, NCARB, NCIDQ, LEED AP BD + C

For more than twenty years in the architectural field, Ann has a wide breadth of professional experience including workplace, housing, higher education, and healthcare/research projects at both urban and suburban scales. Her expertise spans multidiscipline projects, ranging in size and scope from small remodels to new buildings. Her extensive experience as the University Architect for Boise State University (BSU), Project Manager for Nike's world headquarter campus, and architectural designer for the Mayo Clinic's Arizona campus, she constantly seeks new professional challenges in the fields of architecture and construction with a variety of project delivery methods.

As a leader, Ann believes in success that delivers business results as well as bringing together teams with diverse skill sets and backgrounds. Coupled with her experience, she is able to problem solve quickly while navigating complex matrices at the organizational, City, State and Federal levels. Currently, Ann Wozniak is pursuing a PhD in Ecology, Evolution, and Behavior from Boise State University, where she is studying the impact of social design on health outcomes in first year resident halls. Ann has a Master of Architecture from University of Oregon, and a Bachelor of Science in Design from Clemson University. Through a combination of education and work experience, she has developed a passion for and specialized experience in campus environments, brand design/experiential design, and designing for better health outcomes. In her spare time, Ann enjoys volunteering at the Good Samaritan Home, snowshoeing, hiking, visiting hot springs, working on puzzles, and being a single mom to two teenage boys.
